

JOINT PRESS RELEASE — FOR IMMEDIATE RELEASE

ADMA Biologics, Inc. selects SoftExpert Low-Code QBPM Platform to Replace a Legacy QMS Solution

Lancaster, PA — October 15, 2020 — **SoftExpert in partnership with Azimuth Compliance Consulting** today announced that ADMA Biologics (ADMA) of Boca Raton, FL has selected SoftExpert’s Quality Business Process Management (QBPM) platform to replace their legacy QMS solution. This change will accelerate the development of intelligence Business Process Management Solution (iBPMS) based applications that better captures ADMA’s business processes.

ADMA’s initial SoftExpert deployment is the replacement of a popular but outdated legacy QMS solution.

“Azimuth Compliance Consulting, in partnership with SoftExpert, will help us accelerate our movement away from our current QMS solution with its’ form-based interface, to an updated solution that is process-based and allows for the customization of workflows.” said Adam Pinkert, Vice President of Quality and Regulatory Affairs, ADMA Biologics. “SoftExpert’s process automation platform streamlines complex workflows and eliminates forms, while providing increased visibility to system health through analytics, portals and dashboards.”

“ADMA Biologics’ selection of SoftExpert as its new QMS solution reflects a broader, growing shift in businesses to maximize ROI by transforming the automation of their IT business solutions,” said Kevin Bogert, President at Azimuth Compliance Consulting. “Business process transformation and rapid deployment are at the core of what SoftExpert provides. Our partnership with ADMA Biologics is delivering a world class quality business process management (QBPM) solution that will help to streamline ADMA operations, while maintaining GMP compliance.”

About ADMA Biologics

ADMA Biologics is an end-to-end commercial biopharmaceutical company dedicated to manufacturing, marketing, and developing specialty plasma-derived biologics for the treatment of immunodeficient patients at risk for infection and others at risk for certain

infectious diseases. ADMA currently manufactures and markets three United States Food and Drug Administration (FDA) approved plasma-derived biologics for the treatment of immune deficiencies and the prevention of certain infectious diseases ADMA manufactures its immune globulin products at its FDA-licensed plasma fractionation and purification facility located in Boca Raton, Florida. ADMA's mission is to manufacture, market and develop specialty plasma-derived, human immune globulins targeted to niche patient populations for the treatment and prevention of certain infectious diseases and management of immune compromised patient populations who suffer from an underlying immune deficiency, or who may be immune compromised for other medical reasons.
